

Estimated times for product availability Private Orders

The **delivery times** listed below are calculated from the date of transmission of the request to the availability of the product. The delivery times are approximate and not guaranteed. Several factors can influence the arrival of orders (e.g. availability of products, grouping delays, etc.).

For private import only suppliers, instructions will be issued to the carrier within 15 days of the order confirmation date. After this time, the carrier has two weeks to contact the supplier. Pickup will be based on the availability of ships in the country of origin. It is therefore possible that an order will be picked up later than the shipping date displayed on the order form.

For suppliers active in our store network, the IP order pickup will be matched with the next scheduled product order for the network. **Instructions** will be sent out prior to pickup.

The transport of orders **for countries not on this list** must be handled and paid for by the supplier from his cellar to the SAQ warehouse (the incoterm used is DDU).

[We invite you to read the Delivery procedure under Incoterm DDU \(Incoterm 2000\).](#)
